## LETTER -July 2025-

### Branding and Exclusivity

EPD

### Certificate

United Metal Company (UMC) has officially obtained the trademark for **"UNIBOND™"**

A testament to our innovation and quality in advanced metal coatings. This milestone ensures brand protection and reinforces trust in UMC's premium solutions.

EPD Certificate (Environmental Product Declaration) is an independently verified and registered document that provides transparent and comparable information about the environmental impact of a product throughout its life cycle.

### Innovation and Sustainability

UMC has received international verification for the **Environmental Product Declaration (EPD)**

of our Pre-Painted Aluminium and Steel Coils, certified by the International Climate Intelligence System (ICIS). This achievement underscores UMC's commitment to sustainability and transparency, aligning with global standards:

**DID YOU KNOW?**

**Endura is the Best Solution for C5M Environments!**

UniBond Endura

A Superior **Hi-Build Anti-Corrosive** Pre-Painted Aluminium and Steel Coils for Marine and Industrial Environments

ENDURA 60	ENDURA 90
60 $\mu\text{m}$	90 $\mu\text{m}$
MODERATE ENVIRONMENT C3-C4 - R <sub>0.01</sub>	AGGRESSIVE ENVIRONMENT C4-C5 - R <sub>0.01</sub>

When it comes to harsh C5M (Very High Corrosion) environments, Endura stands out as the ultimate protective solution. Designed to withstand extreme conditions—including high salinity, humidity, and industrial pollution—Endura ensures long-lasting durability and performance for your assets.

ENDURA 120	ENDURA 180
120 $\mu\text{m}$	180 $\mu\text{m}$
VERY AGGRESSIVE ENVIRONMENT C4-C5 - R <sub>0.01</sub>	VERY HIGH AGGRESSIVE ENVIRONMENT C5M - R <sub>0.01</sub>
